

NAY OO LWIN

Full-Stack Engineer – TypeScript, Python, and API-heavy product systems

Bangkok, Thailand · English (fluent) · Burmese · Tamil

+66 94 627 7650 · nayoolwinpersonal@gmail.com · [nayoolwin.dev](https://github.com/NayOoLwin5) · github.com/NayOoLwin5 · [linkedin.com/in/nay-oo-lwin-4b3976199](https://www.linkedin.com/in/nay-oo-lwin-4b3976199)

Full-stack engineer with 4+ years shipping production backends and React portals: fintech wallet services, third-party CRM/OAuth integrations, and background-job systems. Strongest on Node.js, FastAPI, and Go, with a bias toward queues, caching, and clear API contracts.

EXPERIENCE

Silent Partner

Dec 2024 – Present

Full-Stack Developer (full-time, remote)

United States

- Built CRM, DMS, and Meta messaging integrations so clients can connect their pipelines and run lead-nurture flows without a custom project per account.
- Shipped automated campaigns that send AI-personalized follow-up messages to customers on those connected channels.
- Designed a modular **FastAPI** integration layer with shared OAuth, retries, and a standard error contract so new third-party APIs plug in without forking the core service.
- Implemented OAuth setups across multiple CRM systems and built **React** internal-portal features for day-to-day operations.

Upwork – Backlink automation (Seomaximus)

May 2025 – Sep 2025

AI Backend Developer (part-time, remote; concurrent with Silent Partner)

United States

- Built a domain-driven **FastAPI** backend for backlink outreach: a Google Search wrapper to find blogs and landing pages, Selenium to scrape contact emails, and validated leads into Smartlead.
- Implemented an AI social-post scheduler on **Celery** (captions, hashtags, image keywords); rendered templated posts with Jinja2 and Playwright and published via Facebook OAuth and the Meta Graph API.

Tensorplex Labs

Mar 2024 – Nov 2024

Backend Developer (full-time, remote)

Singapore

- Built Ethereum and Substrate wallet authentication in **Gin**: verify signatures against the chain, then issue JWTs.
- Ran long-running **FastAPI** jobs on Celery and notified clients over WebSockets when work finished.
- Migrated file storage from Supabase to **S3** in the FastAPI services; maintained Gin and FastAPI backends for REST APIs and background workers.

AYA Pay Digital Wallet (Ayeyarwady Bank Ltd.)

May 2022 – May 2024

Full-Stack JavaScript Developer (full-time, on-site)

Yangon, Myanmar

- Built a push-notification microservice in **Express.js** and firebase-admin: daily device-token refresh into Redis, then Bull.js queues in 500-token batches so sends stay off the main API.
- Built a **NestJS** event-driven service on MongoDB Change Streams to sync writes into a second database; Redis queue with locking to skip duplicates, plus retries on failed events.
- Built a cashback campaign service that runs multiple campaigns concurrently, queuing each payout through Bull.js in Express.js.
- Improved internal **React** portals (form.io forms, pagination, skeleton loading) and integrated third-party billers on Node-RED for request/verify payment flows.

Global Connect Asia

Dec 2021 – Apr 2022

Odoo Web Developer (full-time, on-site)

Yangon, Myanmar

- Researched Odoo modules, ORM, and APIs to ship client ERP customizations on the framework.
- Designed and customized Odoo modules around each client's business workflow.
- Built and supported extended APIs that connected Odoo to other key business systems.

JdeRobot (open source)

Dec 2020 – Feb 2021

Software Engineer Intern (remote)

Spain

- Built a ROS and Gazebo web template for autonomous navigation simulation (Gzweb to the browser over WebSockets; Dockerized to cut CPU/GPU load).

SKILLS

Languages

JavaScript, TypeScript, Python, Go

Backend

Node.js, FastAPI, NestJS, Express, Gin, PostgreSQL, MongoDB, Redis, RabbitMQ, Celery, Prisma, GraphQL, REST, Bull.js, OAuth, JWT, MongoDB Change Streams, Node-RED

Frontend

React, Next.js, Tailwind CSS, Redux

Infra & quality

Docker, CI/CD, AWS, Firebase, Sentry, Jest, Vitest, React Testing Library, Playwright, Selenium

EDUCATION

B.Tech, Mechanical Engineering · JNTU College of Engineering, Hyderabad, India

Jul 2017 – May 2021
